

The University of Southern California (USC) and Keck Medicine of USC strive to offer comprehensive medical benefits that meet the needs of our diverse faculty and staff and their families.

Our health plans offer these benefits for family planning services

- All USC medical plans: testing and diagnosis of infertility
- Some USC medical plans: artificial insemination and fertility medications
- USC Trojan Care EPO and USC PPO plans: The above benefits listed plus IVF and cryopreservation
- Anthem HMO plans: Access up to 40% discount with WINFertility. More information is available by logging into your Anthem.com/ca account, choosing “Care” and “Discounts”

Keck Community Medical Group, Las Vegas Healthcare Center, Local 11, USC Arcadia Hospital, or USC Verdugo Hills Hospital groups may have different family planning benefits. Please contact your local health plan representative.

USC Trojan Care EPO and USC PPO plan enrollees can maximize their plan in-network benefits when they receive services from Keck Medicine. Information about their fertility program is available on the **[HRC Fertility website](#)**.

For additional information about health plan benefits for family planning, call the USC Health Plans Member Services team at 213-740-0035 or the Member Services number on your medical plan ID card.

Medical plan copayments and coinsurance payments for infertility health procedures are eligible for reimbursement from USC’s Flexible Spending Account if they are medically necessary.

This is not a guarantee of coverage. Please review the Summary Plan Description (SPD) or Evidence of Coverage (EOC) available on **Employee Gateway** for more information and limitation of these benefits. Infertility services may be subject to prior authorization. We recommend contacting the Member Services number on your medical plan ID card prior to receiving services to ensure your understanding of the benefits available.
